ONLY PASSION CREATES
THE EXTRAORDINARY

Bod'or once started as a small door manufactory, nowadays we are still a manufacturer of doors with a high demand on design, innovation and functionality. Craftmanship and love for details is what we stand for. Every single door is part of a system solution with ambitious techniques.

The art of less and focussing on the essential.

Cube flush 6 mm, premium silk lacquer RAL 9010

SYSTEM APPROACH

This makes Bod'or different: A matching frame for every door. With the same surface finish as the door, the corresponding technology, optimum closing performance and pleasant sound insulation. We understand

functionality and pride ourselves on doing more with less. No unnecessary details. Frames integrated harmoniously with the wall, with invisible hinges, to create one seamless design across the whole surface.

SPECIAL CHARACTERISTICS:

Design features and high-quality engineering

The typical features and core values of the Bod'or systems help reinforce the definition of „The Original“. The idea „Less is more“ is exemplified by the cubist two-piece frame system which includes fewer visible corners and edges than conventional on the wall constructions.

The systems' design focus is minimalist. This is principally due to our hidden technology – a very important aspect of our designs. Here the visual enrichment comes with the reduction. Experts comment on this with phrases like „simply ingenious – ingeniously simple.“

Flush-mounted or reverse-opening installation solutions as well as our invisible frame design Under-Cover Doorframe, were added to our range over the past few years and have been repeatedly recognised by renowned institutes for their design significance.

RAIL RIT, premium silk lacquer RAL 9010

COMBINED SYSTEMS

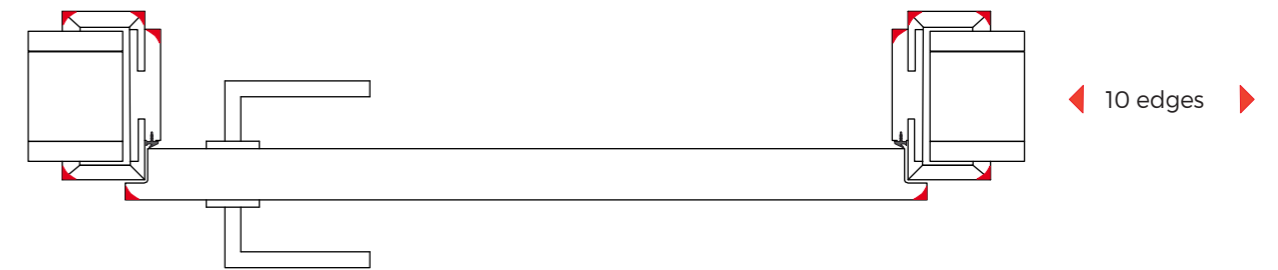

Different systems and colours can be combined in the systems thinking. The goal is to optimally combine functionality with visual design.

#Weconnect

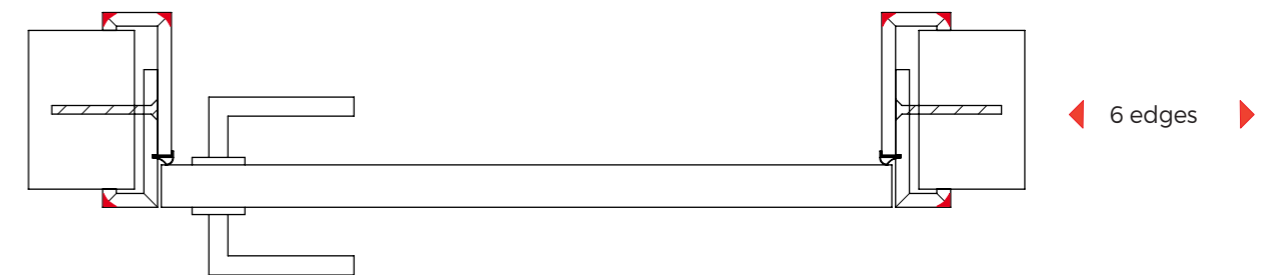

CUBE,

Reduction in shape, fewer corners and edges

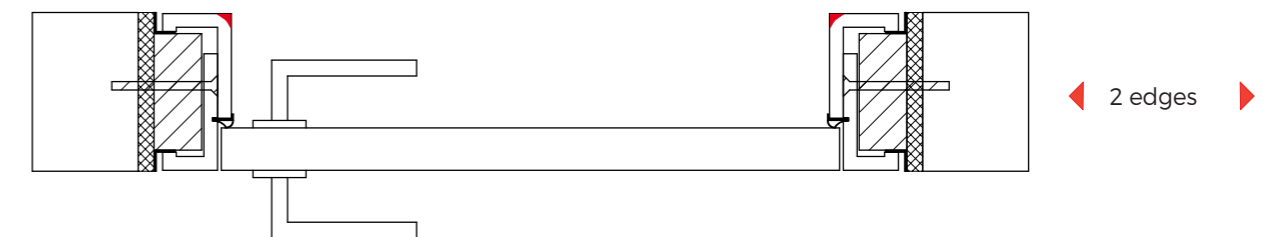

The original CUBE is the door system that has been setting standards in the field of minimalism, combining interior door design solutions with high functionality for more than 15 years. Since then, Bod'or has been fulfilling requirements for contemporary, design-oriented interior design with its CUBE products. Requirements that only „the Original“ can satisfy.

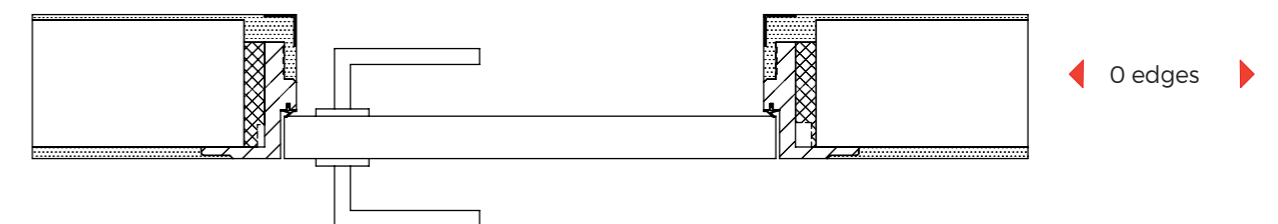

Conventional rebated door set

Cube door set on the wall

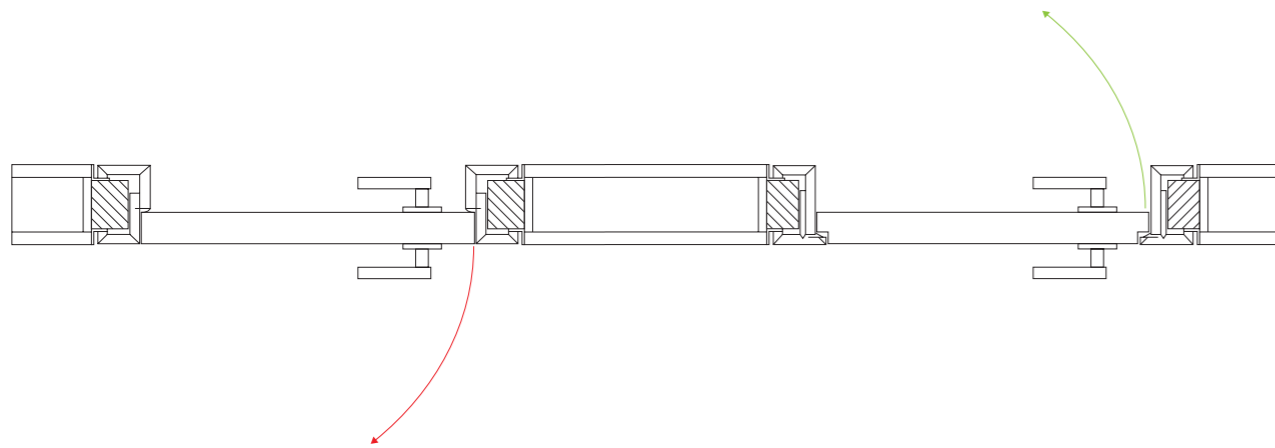

Cube door set flush with the wall

Door set Under-Cover Doorframes

REVERSE

Moving in new directions. Reverse door systems.

Reverse perspectives: RE-Cube, RE-UnderCover.

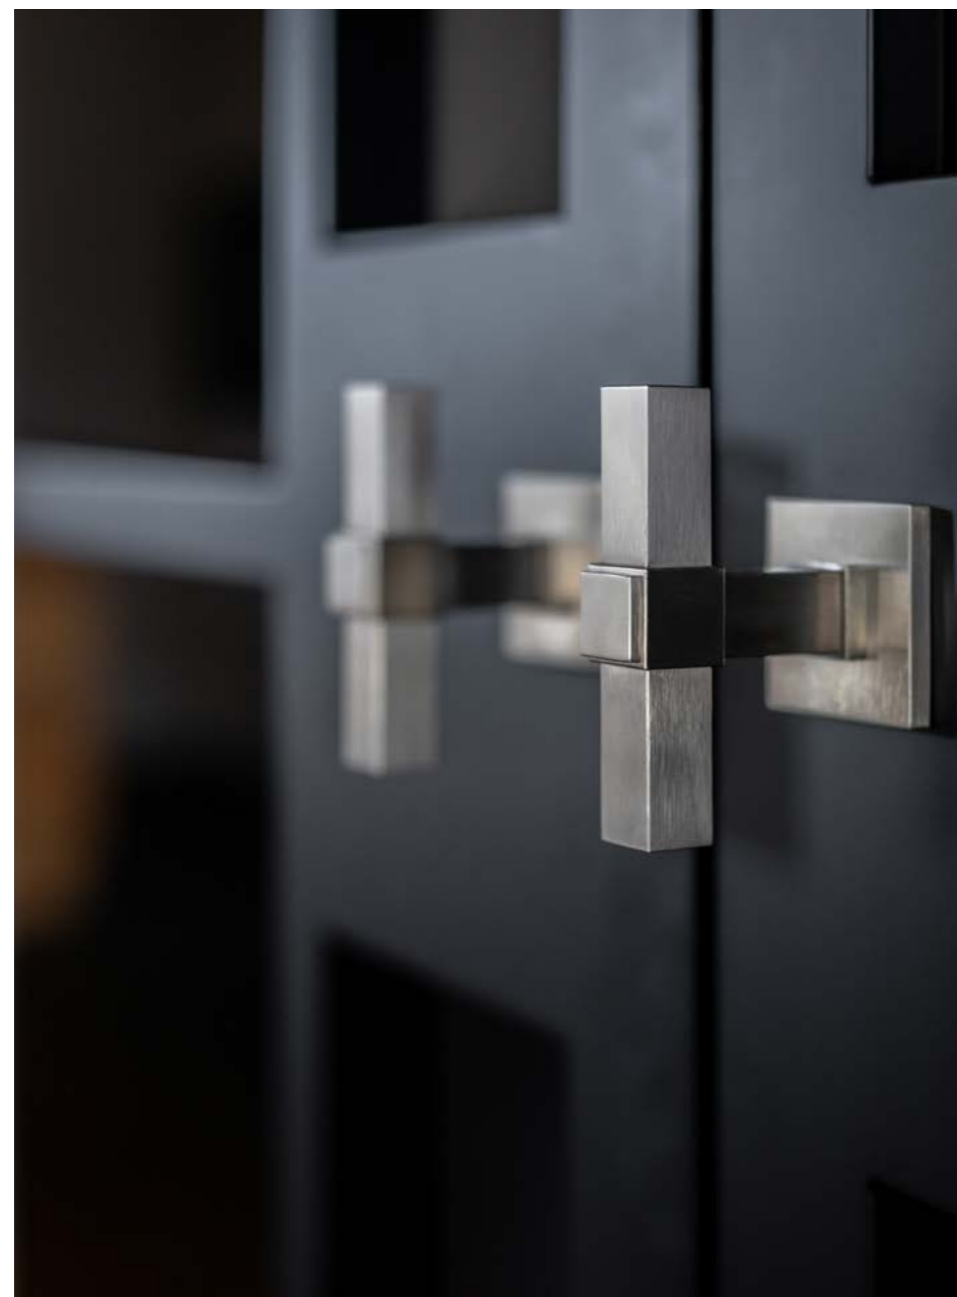

Step away from the ordinary. Reverse doors are flush-mounted and opening inwards.

The visual line remains consistent and the area in front of the wall can be used.

As a result, the RE-Cube offers new planning perspectives from a designer point of view.

RE-Cube flush 6 mm, fineline veneer

SURFACE FINISHES

COLOR COLLECTION

The concept. 11 colours, 3 textures.

Focusing on the essentials. A colour concept that incorporates an international colour spectrum and design trends. 11 primary colours in different surface finishes: Premium Silk Lacquer, Supermatt and Brushed Oak, Real wood veneers with a matte finish. Color Collection enhances the variety of combinations despite the reduced colour range.

Premium silk lacquer and super matt

			
Milk	Grey White	Sand	Soft Taupe
			
Stone	Mouse Grey	Pepper	Concrete
			
Thunder	Soft Black	Traffic Black	

Pure – real oak veneer

			
Milk	Grey White	Sand	Soft Taupe
			
Stone	Mouse Grey	Pepper	Concrete
			
Thunder	Soft Black	Traffic Black	

PREMIUM SILK LACQUER

Typically Bod'or production: high-quality, manually applied multi-layer lacquer.

Carefully processed, the basis for the special quality of the lacquered surfaces.

Lacquer is applied by hand, layer by layer.

Premium silk lacquer is available in the following colours:

Basis:

RAL 9010 | RAL 9016 | RAL 9001

Color Collection:

Milk | Grey White | Sand | Soft Taupe | Stone | Mouse Grey

Pepper | Concrete | Thunder | Soft Black | Traffic Black

Special colours:

SUPER MATT

Apparent contradiction. Visible harmony.

Super matt surfaces appear visually elegant, yet modest
Robust with a pleasant charisma. Supermatt captures the
current trend in its texture and effect, for a truly stylish
interior.

Supermatt is available in the following colours:

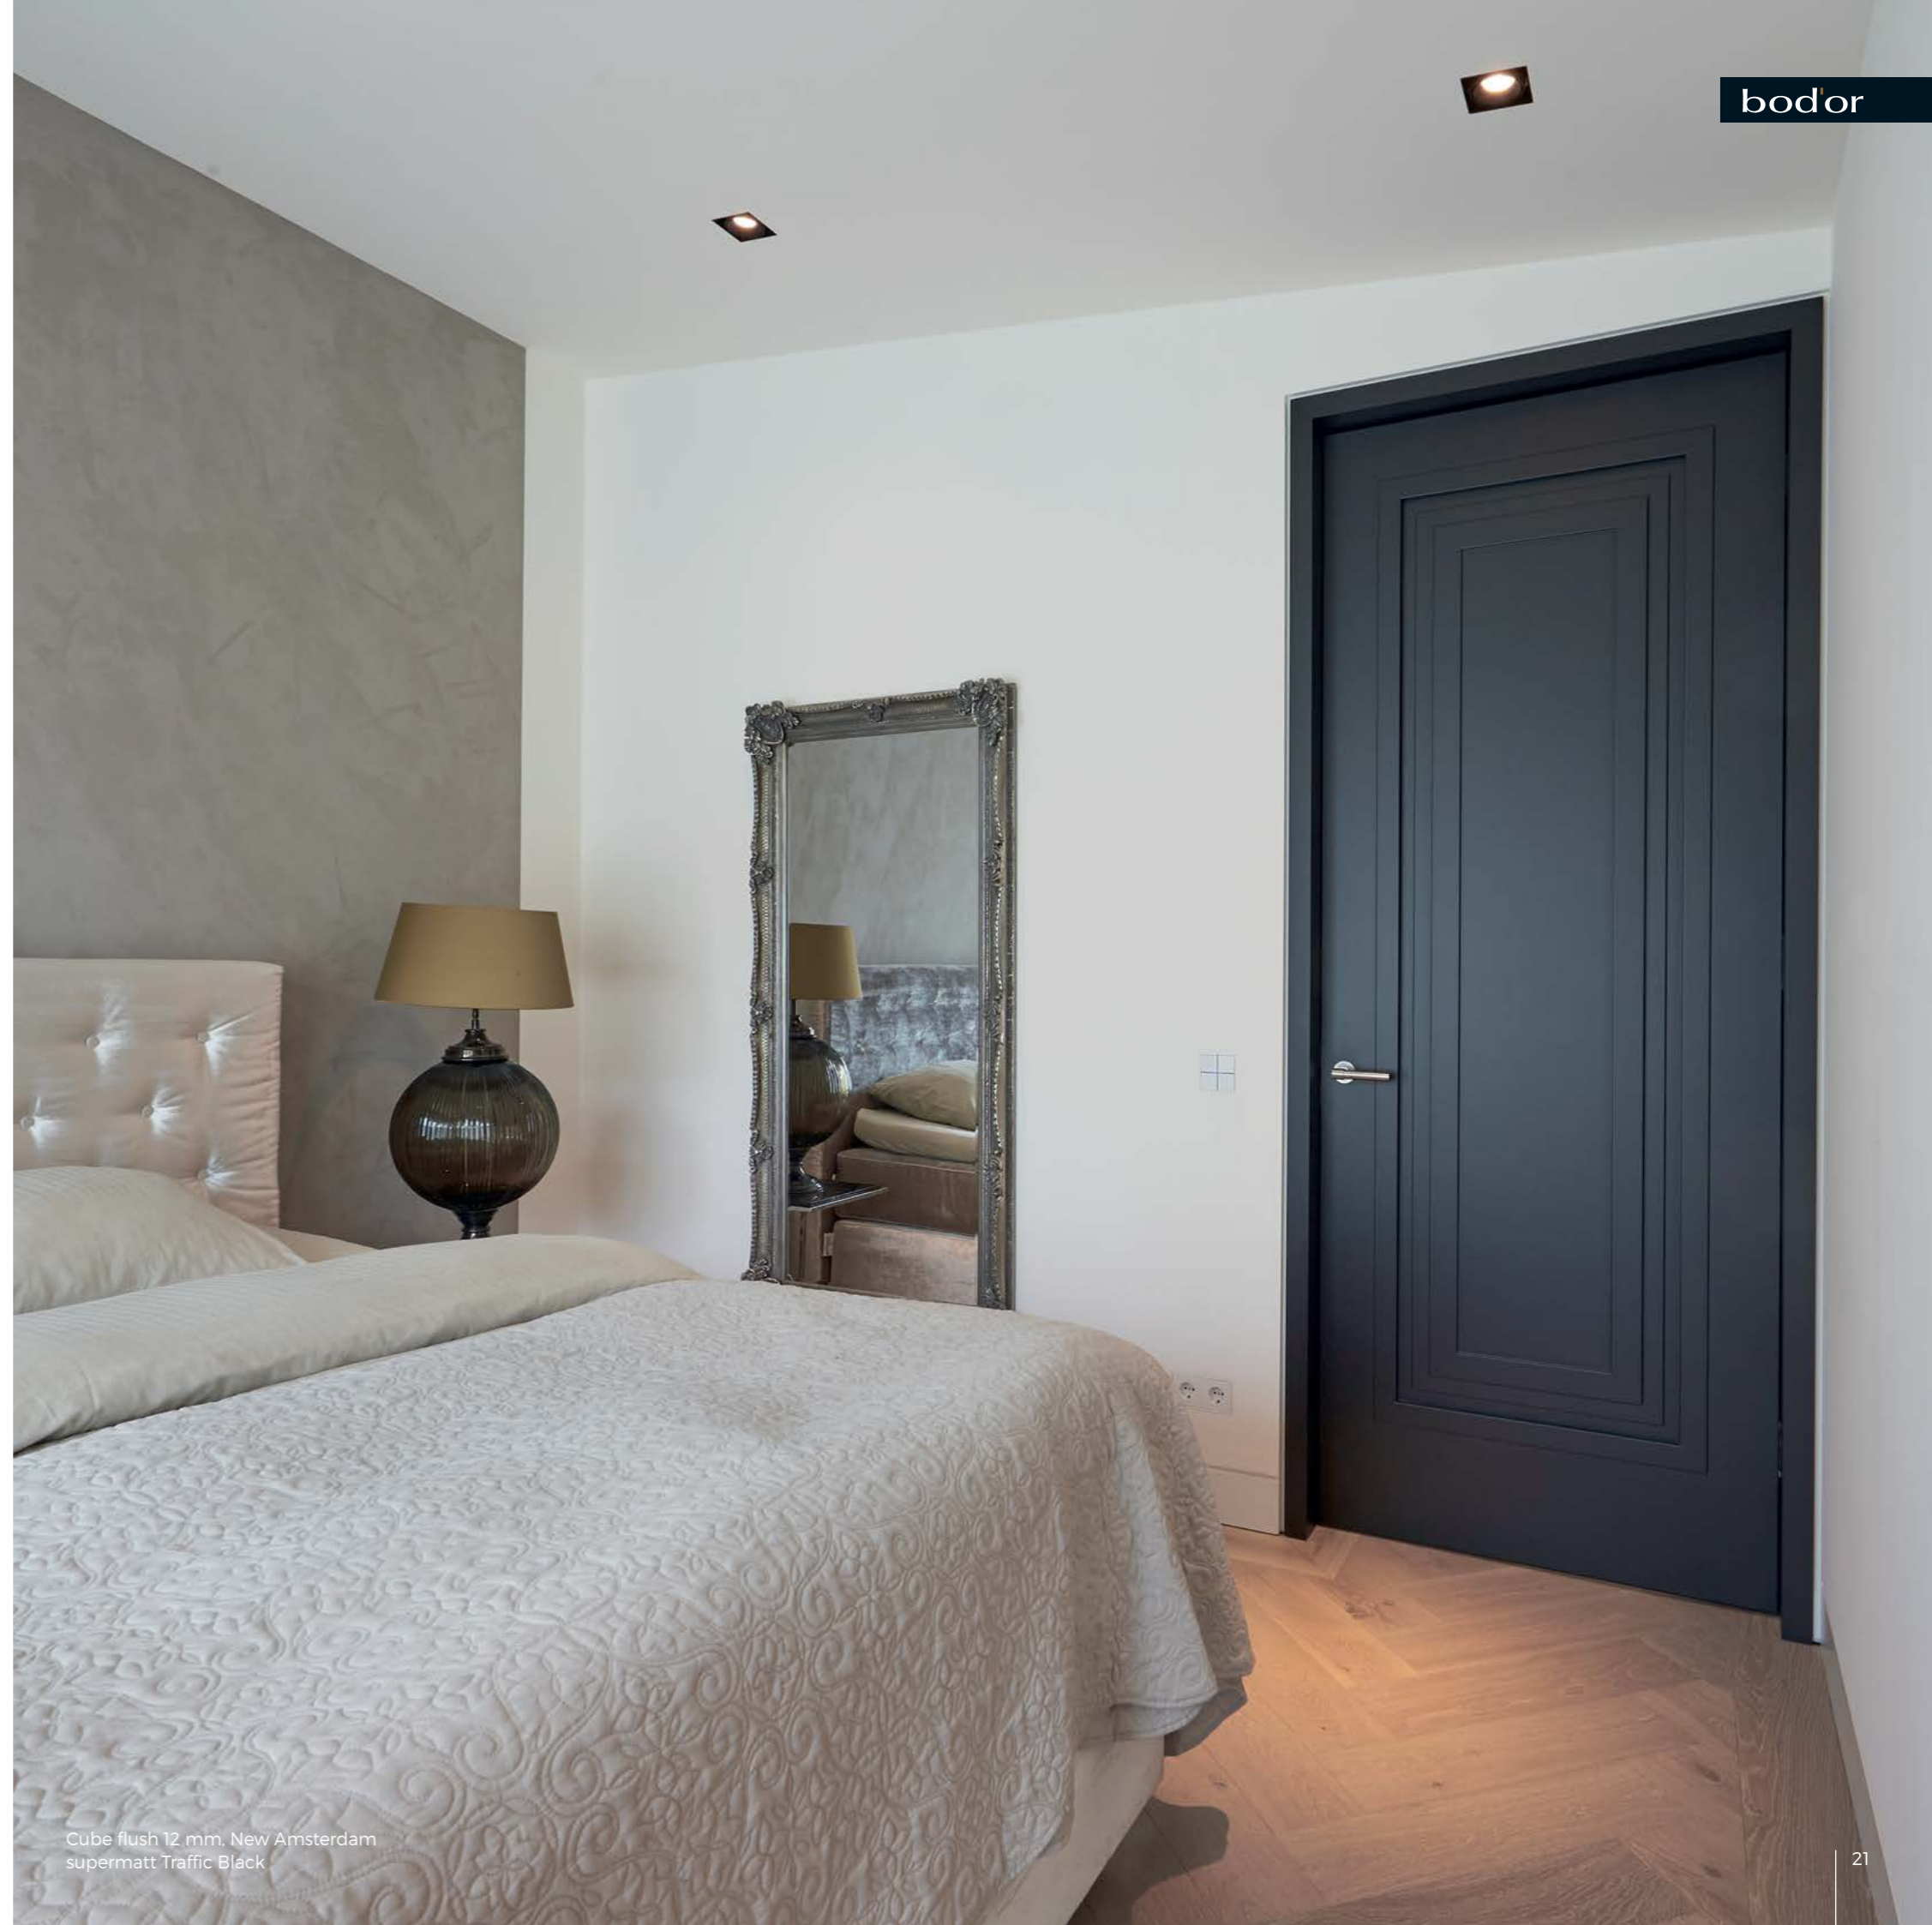

Basis:

White | Black

Color Collection:

Milk | Grey White | Sand | Soft Taupe | Stone | Mouse Grey
Pepper | Concrete | Thunder | Soft Black | Traffic Black

FINELINE VENEERS HORIZONTAL AND VERTICAL

Design protected as a registered design, the horizontal veneer runs across the complete door leaf, door leaf edge and frame for a distinctive, subtle and minimalist appearance. Unmistakable since the horizontally applied veneer was and remains the vision of Bod'or to this day. Or the conventional vertical veneer; the classic style produced by craftsmen over the years.

horizontal veneer

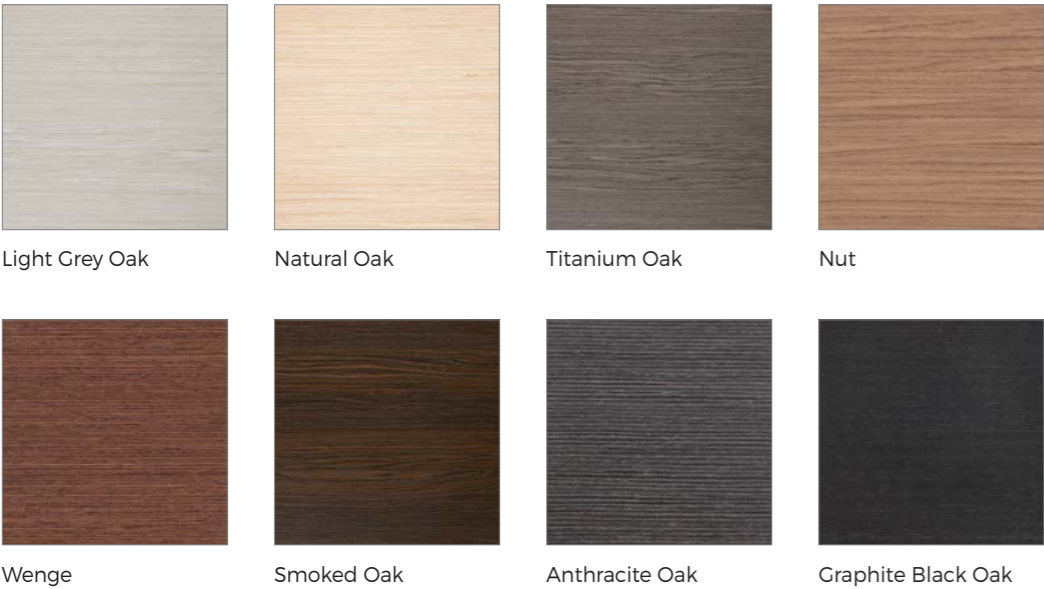

vertical veneer

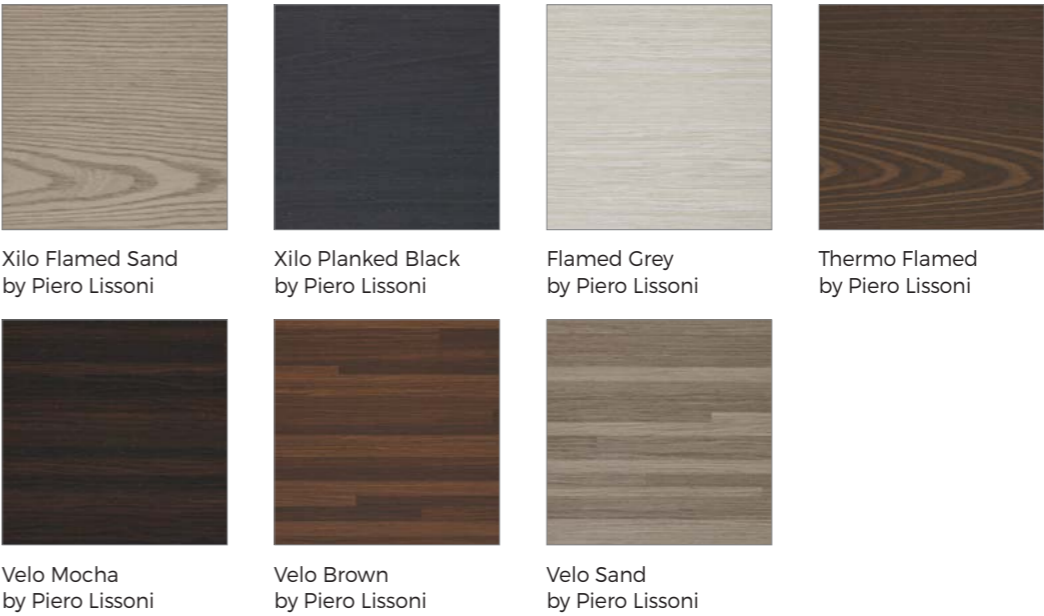

Cube flush 6 mm, veneer Velo brown Collection X

Fineline veneer

Collection X

STANDARD COLLECTION

Authenticity, texture and substance. Veneers in selected woods, on both door and frame to make it the perfect combination. Protected and colour-stabilised with standard lacquer. A durable finish across the entire surface.

The fineline veneer Standard Collection and Collection X are available in both horizontal and vertical veneer

XTRAMATT VENEER

Where two veneer worlds meet: Horizontal and Vertical. Veneers with extraordinary, new finishes. Brought to you from the hand of designer, Piero Lissoni. With distinctive colours and textures. The Xtramatt lacquer finish underlines its' special character. With a protective coating included, everything is designed to match the finishes in the Color Collection. For even greater creative possibilities.

PURE

Natural Oak

Flame Oak

Line Oak

Pure is available with following surface finishes:

- Flame Oak Color Collection
- Line Oak Color Collection

Pure only in vertical veneer

Natural. Real.

This is the surface 'Pure' in our Color Collection. Natural oak forms the basis of the textured effect created here. Clear structures with a bold character dominate the feel of the surface, adding that unique personality. Sophisticated and distinctive highlights. Create a statement with a door matt finish, select from the Color Collection shades.

Eye Catching

Thick wood veneers with a rustic, refined appearance. Sandblasted thick wood veneers with a significant statement. Tactile texture. Visible splits. The perfect contrast to modern furnishings. Natural eye-catching wood in a black, white or natural finish.

White

Natural

Black

RAW only available with vertical veneer

CUBE GRIP

Finest functionality.

With the new Grip door handle design, Bod'or is moving away from fittings and towards greater integration. The door handle is part of the door leaf and part of the design. Inserted harmoniously and functionality only will appear in second place.

Grip is available in following surface finishes:

Premium silk lacquer Basis – Color Collection – RAL / NCS / Sikkens

CRAFTSMANSHIP

Bod'or. Focused on and forward thinking, in terms of spaces, colours and sizes.

The guiding principle of design "Form follows function" has always set the trend for the manufacturing practices used in the production of high-quality doors in Bocholt. That depends on the skill of our craftsmen. The individuals make the difference in quality. And: with new functions, they develop and create ever-changing possibilities that well-known designers bring to a new level.

The art of authenticity

Not just veneers but artistry of veneers. The surfaces in the new veneer collection look natural and unfinished. Here the feel of real wood is retained. But in reality the lacquer layer is staged in such a way that it gives an authentic look. Therein lies the skill.

FORMS

bod'or

High quality door systems.

At Bod'or, the interplay between the individual components of the door system determine the particular shape and special functionality of the whole.

RE-Cube flush 6 mm, premium silk lacquer RAL 9010

LINES

Giving a clear signal as part of the design concept.
Lacquered doors with machined lines incorporated into the design.

U-groove

Lines available in following surface finishes:
Premium silk lacquer Basis – Color Collection – RAL / NCS / Sikkens
Supermatt Basis – Color Collection

Groove on door leaf only. Groove in frame not possible.

Cube on the wall, premium silk lacquer RAL 9010

CUT

Giving a clear signal as part of the design concept.

CUT- Lines that outline the shapes. In this design, the line layout is striking, spanning both the door leaf, door edge and frame. This stylistic element by Bod'or KTM defines the difference in quality and underlines our manufacturing knowledge and expertise.

With mathematical precision.

Half round groove

- CUT available in following surface finishes:
- Premium silk lacquer Basis – Color Collection – RAL / NCS / Sikkens
 - Supermatt Basis – Color Collection

Groove on door leaf and door edge. Groove in frame optionally.
Groove on reverse door on door leaf only.

DESIGN LINES LACQUER

Distinctive, hand-crafted and functional.

Working in cooperation with established designers, we develop ideas about more than just doors. This evolved into systems that can be variably applied to concepts and spaces. This synergy between materials, design and functionality come together in the Design Lines Lacquer range. Unique line design in a hand-lacquered quality.

V-groove *

Design Lines lacquer available in following surface finishes:

DESIGN LINES PURE

Strength from the source.

Genuine wood with real design. A passion for craftsmanship and wood combined with the feel for trends and design are merged in the Design Line Pure door range. Genuine wood implemented with good design. Tradition hand-in-hand with trends.

TURN, Le cadre 2 premium silk lacquer RAL 9017

TRANSPARENCY

Do not divide, but connect.

individual rooms, that complement each other perfectly. Light passes through spaces and continuous lines to connect spaces. Following these concepts, our designers have developed door systems that uniquely reflect our interpretation of transparency. And functionality.

LUMIA

A lot of glass or little glass. A lot of transparency but little view of the inside. A lot of versatility and little constraints.

With the new Lumia glass range, Bod'or demonstrates a clear intent: One for all and all for everything. Lumia can be utilised in all Bod'or door systems. The interplay between the glass and wooden surfaces becomes even greater with the Lumia range. Also because Lumia is available in several glass colours. With the new Lumia glass range, Bod'or is breaking new ground in terms of transparency in design, which in the past has shown to be central to new design features.

Lumia is available with following surface finishes:

Premium silk lacquer	Basis - Color Collection - RAL / NCS / Sikkens
Super matt	Basis - Color Collection
Fineline horizontal veneer	Standard - Xtramatt
Fineline vertical veneer	Standard - Xtramatt
Pure Flame Oak	Color Collection
Pure Line Oak	Color Collection

VISION

The glass surfaces determine the transparency of the doors and the glass varieties determine the impact. Can this thought be expanded even further? Without visible frames? To satisfy these ideas, we designed Visions. A door collection that utilises frameless glass.

Vision is available with following surface finishes:

- Premium silk lacquer
- Basis – Color Collection – RAL / NCS / Sikkens
- Super matt
- Basis – Color Collection

SPECIAL DESIGN

Fusion of creativity

Our designers and architects characterise their collaboration with Bod'or as a creative merger. Practically this means: The creative potential of both partners merges here and creates something innovative. The products from the Special Design collection create extraordinary and diverse features, leading to unique solutions.

Our partners design extraordinary and diverse interior design features with their teams of architects and designers.

They provide us with advice on colours and trends. These partners travel around the world and work within the international design environment. Those at the forefront of architecture also use our products.

SIZES

XXXL DOOR SETS

Maximum size

Think beyond standards. Individual dimensions.

Think big. Redefine spaces with oversized doors. Creating atypical sizes remains one of our core strengths.
XXL doors, lacquered, veneered - up to 3000mm. Individually programmed and manufactured.

Under-Cover Doorframes, premium silk lacquer RAL 9010

UNDER-COVER DOORFRAMES

Focus on the essential.

Once installed, the Under-Cover Doorframe is an under plaster mounted invisible frame. The frame is constructed from a composite which has the same elasticity coefficient as plasterboard. With an Under-Cover Doorframe, you can create a seamless wall connection that reduces the risk of cracks.

SLIDING DOOR SYSTEMS.

Stage visual movement.

Make functionality visible. Or invisible. Sliding door systems on or inside the wall. With guide rails in the ceiling or floor. With steel framework and roller guides. Obvious or discreet. Apparently floating doors. Everything is possible. Even if no technology should not be seen.

The new WeConnect concept allows us to connect. Connect to craftsmen, building trade professionals and architects. Bod'or intends to create a network that strengthens the 'We' feeling, transfers knowledge and expertise, reveals and strengthens synergies for all stakeholders for our future.

We strive to make the combination of data from the online community, where information and inspiration can be generated, and the offline community, where experiences and exchanges from person to person can be found.

AWARD WINNING DESIGN

THE ORIGINAL

We underscore the definition of „The Original“ by utilising legal instruments such as design protection or the protection of registered designs for all doors and systems within the Bod'or brand.

We are quite prepared to consistently use our options as copyright holders to protect our products and prevent plagiarism, thereby ensuring the reliability of our products and justifying the trust our customers have in our products.
